OUR EDUCATIONAL PROGRAMMES ARE ENRICHED BY THE FOLLOWING:

**SMART Notebook software**
Creates and delivers interactive lessons using a variety of drawing, annotation and presentation tools.

**Vernier LabQuest**
Engages students with hands-on science in the classroom or in the field.

**iPad**
Provides software that reinforces literacy, numeracy and fine motor skills.

**Cybersmart**
Provides activities, resources and practical advice to help students safely enjoy the online world.

**Reading Doctor Programme**
Fun, effective, scientifically based phonics software designed to dramatically improve basic reading and spelling skills.

**iPod Touch**
Assists students in basic literacy and numeracy skills as well as fine motor skills.
**Dragon NaturallySpeaking**
A speech recognition software programme that transcribes speech onto the screen.

**Dino-Lite**
A handheld digital microscope that enables students to closely observe their environment.

**Clicker 5**
An interactive reading and writing programme that helps students to achieve success in reading and writing.

**ActivExpression**
Encourages students to communicate and check their comprehension across the curriculum.

**Flip Camera**
Captures random moments across the curriculum.
